

What's in a "name"?

For each question and each choice is an ODK-type survey (whether you use ODK, KoboSurvey CTO, ONA, ...) there is always a "name" and a "label".

NAME

"I am the name that you give me during the coding of your form structured in a language that Kobo understands so that it knows exactly which question or choice I correspond to."

LABEL

"I am the text for a question and its choices that will appear on your smartphone or tablet."

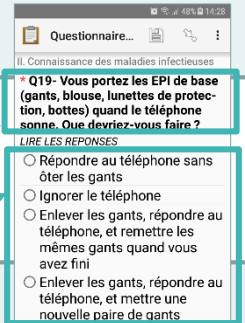

Where do enumerators see me?

➔ Nowhere !

➔ In ODK Collect.

Question's label

Choice's label

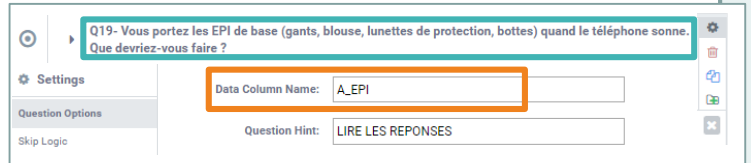

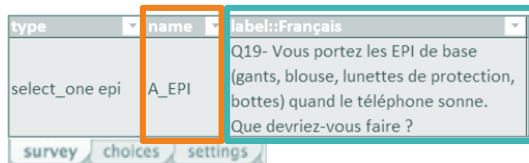

Where do survey coders see me?
